IMPORTANT INFORMATION

THIS MAY SAVE YOUR LICENSE!

**DO NOT** CLOCK OUT AND WORK OFF THE CLOCK.

When you clock out for lunch, you should go to lunch at that time and clock back in at 30 minutes. After giving your report and when you clock out at the end of your shift, you are done with your shift/work and should leave the unit. RNs should not be clocking out and finishing work or charting off the clock. This may be deemed time card fraud and may result in your being disciplined by management.

**DO NOT** COVER ANOTHER NURSE’S ASSIGNMENT IN ADDITION TO YOUR OWN FOR LUNCHES, PROCEDURES OR SHIFT.

It is dangerous for patients and it puts your nursing license in jeopardy. Even though the hospital violates Title 22 of the California Code of Regulations by staffing out of ratio, if you accept the assignment and there is a negative patient outcome, you will be responsible. You should notify your charge nurse, manager or director to notify them of the need for additional staff.

**DO NOT** VIOLATE HIPAA!

HIPAA requires protection and confidential handling of protected patient health information and should be shared with as few providers as necessary and only to the extent required for each provider to fulfill his/her role.

Posting of protected patient information, photos and other identifiable information on social media (Facebook, Twitter, etc.) is a violation of HIPAA.
