

JOINT LABOR-MANAGEMENT EDUCATION FUND KAISER PERMANENTE MEDICAL CARE PROGRAM UNITED NURSES ASSOCIATIONS OF CALIFORNIA/ UNION OF HEALTH CARE PROFESSIONALS ***COURSE ANNOUNCEMENT***

OVERCOMING ANALYSIS PARALYSIS July 26 and 27, 2017

CLASS DESCRIPTION: What is the significance of an elevated Mean Corpuscular Volume (MCV)? What does an elevated blood urea nitrogen (BUN) level indicate? What is the diagnostic difference between ST depression and ST elevation? How does pregnancy affect normal lab values? This seminar will look at the answers to these and many other questions regarding laboratory and diagnostic tests. Participants will learn the significance of both the normal findings of numerous commonly ordered laboratory tests as well as the implications of various abnormalities. Content will cover everything from hematology to chemistry studies, liver function tests to kidney function tests as well as topics such as interpreting the electrocardiogram and the chest X-ray. This seminar is meant to enhance the practice of healthcare workers in all clinical areas.

OBJECTIVES: Upon completion of this program the participant will be able to:

- Identify the indications and benefits of various diagnostic tests.
- Describe the normal values associated with various diagnostic tests.
- Recognize abnormal diagnostic results and associated disease processes.
- Interpret diagnostic data as it relates to patient scenarios.
