Prime Can and Should Afford to Invest in RNs and Patient Care

Today we gave management a package proposal that would make improvements to compensation, multiple benefits and education—at a time when Prime continues to operate with enormous profit margins.

Prime can afford to invest in quality patient care and RNs at Chino Valley by bringing compensation and benefits up to community standards, so they can recruit and retain the best nurses to provide consistent, outstanding care.

Our proposals again included a wage grid that will reward experience throughout a nurse’s career at Chino, along with education benefits that will incentivize RNs to grow in their knowledge and professionalism.
